DALLAS DEMOLITION®

Dallas Demolition is a full service contractor specializing in Industrial, Commercial, and Residential demolition.

We keep a close watch on protecting our natural resources through recycle, salvage & re-purpose.

Our highly trained professionals are experienced with sites containing asbestos, heavy metals, reactive chemicals, PCBs, electroplating wastes, hydrocarbons, explosives, and other environmentally sensitive materials. Our extensive experience includes specialized remediation and removal tasks involving hazardous, explosive, and/or toxic substances, e.g., decontamination of process vessels and components containing hazardous materials or residues and remediation of sites contaminated with toxins such as mercury, chromium, lead, and arsenic.

WE RECYCLE 70-100% OF ALL DEBRIS

Dallas Demolition takes the health of our environment seriously and use every available option to recycle, re-purpose or reuse construction materials. Our company has demolished High rises, Industrial plants, Smoke stacks, Malls, Apartments, Tunnels, Skybridges, Bridges and single family housing.

PLANT DECOMMISSIONING

Dallas Demolition prepares facilities and sites for alternative uses and real estate transfer. From underground storage tanks to towering smoke stacks, our site-specific plant/process decommissioning services provide cost-effective, no-fail solutions. We decontaminate, dismantle, and demolish process lines, systems, and structures, including steel and concrete.

ASSET RECOVERY

As a value-added service, Dallas Demolition provides professional marketing communications campaigns to reduce your overall costs through equipment asset recovery. We maximize the value of used or unused building materials through effective reuse or divestment. We practice asset recovery at every level, with the end goal of obtaining the greatest possible return from the asset for our customers.
